Graduate Studies in Clothing and Textiles

The Department of Clothing and Textiles offers both Master's and Ph.D. Degree programs in Textile Science, Social Psychology of Clothing, Fashion Marketing, Clothing Ergonomics, Fashion Design, Clothing Engineering, Korean-Western Historic Costume, and Folk Costume. These programs are designed to prepare graduates for research, teaching, and administrative positions in universities, companies, the clothing industry, and the government.

Degree Programs

Our degree programs nurture your personal vision and help to achieve your individual goals by working closely with faculty mentors. Students have numerous choices to earn academic degrees in the specialized areas necessary to pursue advanced professional practice (master's degree) or to develop the research and scholarly skills (doctoral degree). Our graduate programs not only provide theoretical and technical knowledges in clothing and textiles, but also of life after degree programs; presentation skills, time management, leadership, and creativity.

Research Laboratories

- *Textile Science Lab*
- *Fashion Marketing / Psychology Lab*
- *Clothing Human Ergonomics Lab*
- *Fashion Design Lab*
- *Clothing Engineering Lab*
- *Folk Costume Lab*

Graduate Assistantships

Our department has a few (limited) openings of teaching assistant (TA) and research assistant (RA). Students who want to work in their own discipline are encouraged to discuss their desire for employment in the academic unit with their departmental faculty and staff. Graduate assistantships also are available in numerous non-academic departments across the campus. These opportunities include several administrative and research centers. Job responsibilities focus on the needs of the hiring unit and may include general office duties, research, data entry or analysis, etc. For eligibility requirements for assistantships, students are expected to enroll as a full time student in a graduate degree program.

Campus Life

Clothing and Textile students take advantage of resources available to all Chonnam National University(CNU) students including libraries, independent research opportunities, clubs, sports, and more. Through extra-curricular activities, students gain leadership experience and collaboration skills as they investigate career opportunities, work to foster opportunities for other students, volunteer locally, and shape the college's priorities. They live, work and take classes with students from across campus, studying with faculty. We invite you to get to know some of our students better.

Gateway to your Future!
